

MX20 Quick Reference Guide

1. Turn the power on (press **+** key **or** turn the **rotary knob** clockwise past the detent to turn power on. Press and hold both **+** and **-** keys **or** turn the rotary knob fully counterclockwise to turn power off). The screen will remain dark for a short time while the MX20 performs start-up and self-test operations.
2. Adjust the brightness, if necessary. Press **+** to increase brightness. Press **-** to decrease brightness. Or, pull the knob out and turn the knob to adjust brightness manually. To return to automatic brightness control press and hold both the **+** and **-** keys. Release the keys when they flash. **Or**, push the power knob in to return to automatic brightness control.
3. Check that all tests pass on the Start Up screen.
4. Press the **FN** key to view available functions. Each press of the **FN** key will step through the lists of available functions.
5. Press the "smart" key below the function label to select the desired function. Press the **FN** key again to view functions. See *Figure A*.
6. Once a function is selected, the function labels change to give options for that function. Press the "smart" keys below the labels to choose options. See *Figure B*.
7. Once a function is selected, the **Menu/Enter** key is used to give additional options. See *Figure C*.
8. Press the **Line Select** key next to the displayed option to choose desired capabilities. Some options use multiple key presses for different states for the option. Press the **Menu/Enter** key again to extinguish the option display or it will extinguish automatically in 20 seconds. See *Figure C*.
9. Refer to the Detailed Operation section of the *Pilot's Guide* for more details on each function.

Terrain Color Key
